

How did the COVID-19 pandemic impact jobs and employment in Niagara?

The economic impacts were felt by both **employers and the workforce.**

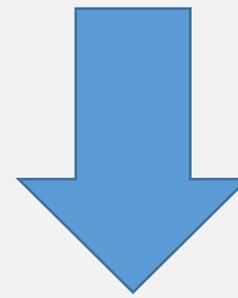

2019: 204,300
employed Niagara
residents

2020: 190,600
employed Niagara
residents

13,700 Niagara
residents lost
employment

2019: 187,733 jobs from
Niagara employers

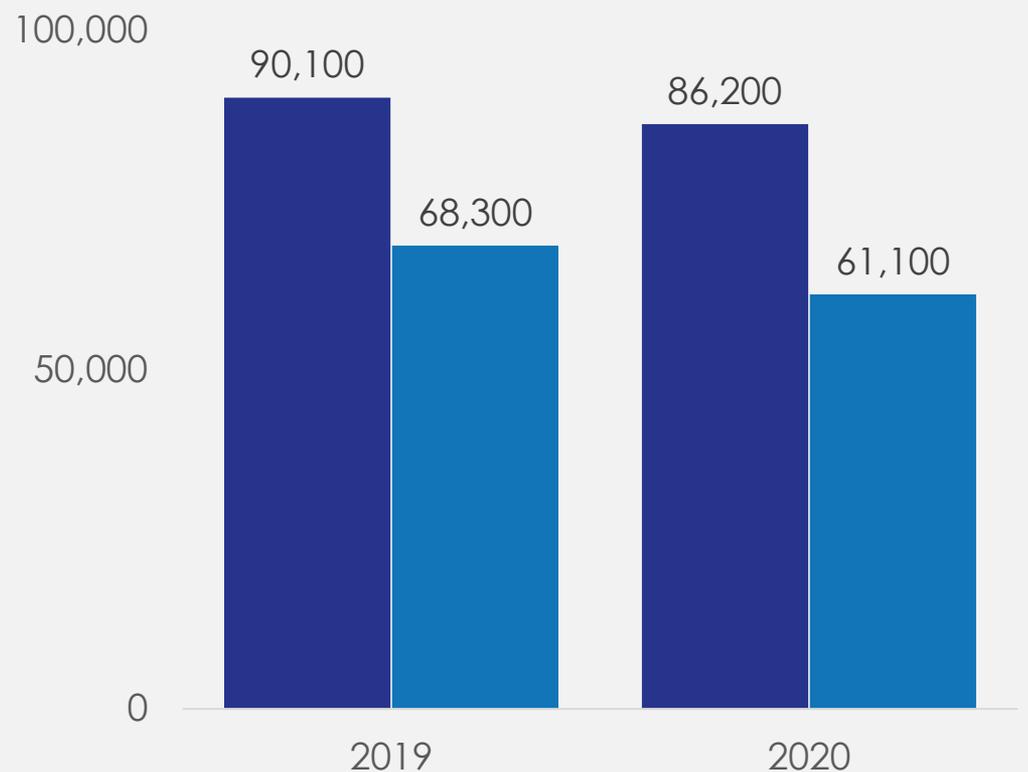

2020: 166,397 jobs from
Niagara employers

21,377 lost
jobs

Not everyone lost employment equally

3,900 men lost full-time work
in 2020

7,200 women lost full-time
work in 2020

78.8% of Niagara's total employment losses were among individuals doing sales and service work

80.3% of Niagara's total employment losses were found in two industry sectors: accommodation and food service and wholesale and retail trade

Amid the challenges, increased job demand in Q1/Q2 2021 shows some signs of tentative steps toward recovery

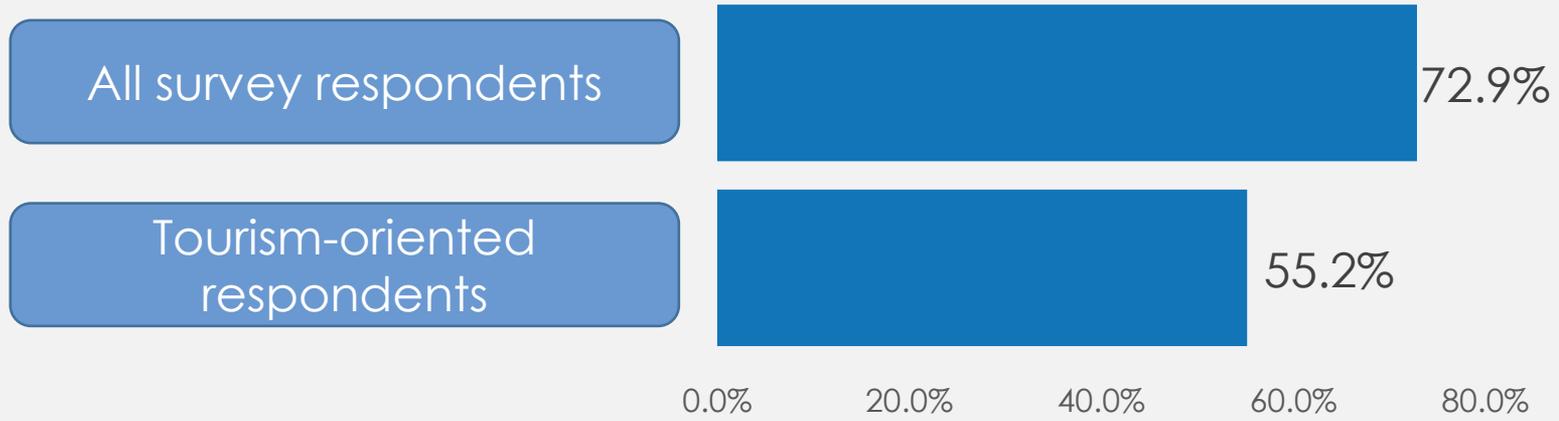

From February to March, local job demand increased by almost 70%

Even with April's decline in job demand, month-over-month employment gains in March and April saw 7,000 Niagara residents gain employment

Almost three-quarters of employers responding to a recent business survey reported **stable or better business conditions**. However, among tourism employers only slightly more than half could make the same claim.

Local employers reporting stable or better business conditions

As of March 2021, the number of Niagara residents employed in tourism supporting industries had fallen by more than half from 39,134 people pre-pandemic to 18,672. Preliminary analysis does suggest Niagara is seeing signs of a humble employment recovery in this sector, as well.
